

ADVANCING INNOVATION

# IMPLANT TROLLEYS

The Novalok Implant trolley is a popular must have in the busy healthcare environment. Epoxy powdercoated over a zinc passivated coating provides a durable finish to the system plus gives an excellent aesthetic appearance.

## Chassis

New and improved Novalok chassis. Now can take Novex shelf inserts, acting as a bottom tier. On lighter duty units wheels can be mounted directly to Novalok shelf units, for heavier duty applications, a chassis is used. we recommend anything over 200kg to have a full chassis.

## Rails

30 x 30 x 3 Standard angle rail.  
30 x 40 x 30 x 2.5 Heavy Duty Channel rails also available.  
Standard lengths available: 800, 900, 1000, 1200, 1400, 1500, 1600, 1800, 2000

## Castors

Top quality castors used only. Standard to supply 2 x Brake and 2 x non brake for all Implant trolleys

## Frames

Each frame is made up of two posts and horizontal & diagonal braces.  
Standard Sizes: 900H, 1200H, 1500H, 1800H, 2100H  
Standard Depths: 300D, 450D, 600D

## Novex

Most popular shelf finish is Novex shelf inserts. 200mm single sections. Other Shelf options available include: Wire Racking and Solid Panel.

## End Grip Handles

When moving trolleys around the simple option is to git end handles and make the job safer and easier on your body.  
Handles are fitted vertically onto the frame of the trolley.
